

OPTICROP: SMART AGRICULTURAL PRODUCTION OPTIMIZATION ENGINE

FUNCTIONAL FEATURES GUIDE

1. Core OptiCrop User Features

- Form Input Validation: Prevents text inputs or negative values in fields like pH and rainfall.
- Crop Recommendation Display: Renders the recommended crop and system prediction confidence.
- Yield Forecasting: Displays expected yield in tons per hectare based on seasonal and regional parameters.
- NPK Diagnostic prescripts: Highlights nutrient levels and provides recommendations for fertilizers like Urea, SSP, and Potash.
- Visual Analytics: Displays performance charts (confusion matrices, feature rankings) dynamically.
