

OPTICROP: SMART AGRICULTURAL PRODUCTION OPTIMIZATION ENGINE

SYSTEM EXECUTABLES INDEX

1. Description of Source Executables

File Name	Location	Description
app.py	Root	Main Flask application server containing routes and log
train_models.py	Root	Runs data preprocessing, fits models, and saves the pipeline
generate_datasets.py	Root	Generates the mock datasets used to train models.
pytest.ini / tests	Root	Configuration and scripts for unit testing.

2. Output Executables

Model files are saved in the 'models/' directory (e.g. 'best_model.pkl', 'scaler.pkl', 'yield_model.pkl'). Performance charts are saved in 'static/images/'.
